

HPM.1.1 Request Special Types of Red Blood Cells

Procedure Area: Hospital Patient Management Procedures (HPM)

Version: 2.0

Purpose

- To place patient orders for special types of red blood cells without submitting a sample for testing.
- To request special services such as antigen-negative, irradiated, sickle cell negative, and pediatric aliquots.

Scope

Customers

Materials

- ✓ Computer workstation
- ✓ HemaControl online ordering system

Procedure Notes

- Do not use this procedure for stock orders; refer to **HIM.1.1** for information on completing the *Daily Blood Inventory/Order Report* form.

Procedure Steps

1. Log in to HemaControl.
2. Select **Place Order**; the Place Order screen displays.
3. Perform the following from the Place Order screen (See [Figure 1](#)).
 - a. Select **Specialty** from the Type dropdown menu.
 - b. Select the priority (Stat, ASAP, Routine) from the Priority dropdown menu.
 - c. Select **Detailed Component**. The Detailed Component Form displays.
4. Perform the following in the Detailed Component Form (see [Figure 2](#)):
 - a. Select **Red Blood Cells** from the Component dropdown menu. The Blood Type dropdown menu displays.
 - b. Select the blood type from the Blood Type dropdown menu.
 - c. Enter the quantity, options, negative antigens, and/or comments in the displayed fields as appropriate.
 - d. Select **Add to Order**. The Place Order screen displays.
5. Perform the following from the Place Order screen:
 - a. Complete the additional fields as appropriate (fields marked with * are required). See [Figure 3](#).
 - b. Select **Place Order**. The Review Order screen displays.
6. Review the order on the Review Order screen and select **Confirm Order**. The order is transmitted and a confirmation screen appears.

Notes

-  Select **Start Over** to delete the order and return to the Place Order screen.
-  Select **Make Changes** to edit the order.
-  Select **Cancel** to cancel an order or exit out of a form/screen.
